The PRP has the following removal things to complete:

- Separation and removal/disposal of sludge waste from Tanks 7, 10, 26, 27 and 30;
- Disposal of liquid wastes (non-oily) from Tanks 7, 10, 26, 27, and 30 at Texas Molecular; and
- Remove visible oily contaminated soils.

The PRP has already gotten rid of close to 8 million gallons of liquid wastes at Texas Molecular.

We would like items 1 and 2 complete by July 1, 2011 and item 3 by December 31, 2011.
